

Organic Purees

Zebedee's are pleased to introduce a great new food range for babies. We have developed and produced our own **100% Organic Frozen Baby Food Purees**. This new range is totally additive and preservative free.

Our nutritious baby purees are steam cooked to preserve all nutrients, and then frozen to preserve all natural flavours and colours.

We have a range of purees from stage 1 upwards.

Our product range will vary depending on season and availability of ingredients.

Each box of purees come in a variety of three different flavours making a total of 20 conveniently sized cubes, each weighing approximately 36 grams.
